DOUDOULIAKIS GEORGIOS (FRONT END WEB DEVELOPER)

My enthusiasm for building websites brought me to the 'world' of Front End Web Development in early 2020. Started with simple websites and thereafter enhanced my skills in JavaScript, i started learning Angular 2+. I'm passionate about what i do, i love solving problems and learning every day something new or enhance my existing skills. I try to write clean code in the best possible way in order to achieve better performance and coding experience with respect to user experience (UX).
